

Three Sisters Tourist Park

Built using Wee Jasper Stone, located in the World Heritage-listed Blue Mountains. 3000 Feet above sea level the Three Sisters is Australia's premier tourist attraction. Wee Jasper Stone bookleaf and flagging are utilised for this high profile natural attraction situated in the Jamison valley.

The stone was required to match the earthy colours of the Blue Mountains. This is achievable due to the unique formation of the quarry which allows the stone to present an array of colours due to oxidation of the stones edges.
