

Our Bookleaf (Stack Stone) is attributed to the unique formation of the quarry, allowing the stone to be split straight from the quarry face.

Wee Jasper bookleaf comes in a standard format, made up of varied sizes, shapes and thickness. We also offer Large Format, whereby the thickness is controlled to a larger specification. Each piece is "Hand Picked" and packed, each pallet contains either blue face, a coloured face or a mix of both faces.

Browse through the images and you can see a range of uses from feature walls, internal walls, public works, water features and many more forms.
